Freight classifications

SMALL PACKAGE

One item weighing no more than 20 kg and no greater than 100,000 cm³. It must be safely carried by one person, suitably packaged and clearly labelled.

How to measure: Measure the longest length, width and height in centimetres, then multiply:

Length × Width × Height = cm³

Example: 60 cm × 40 cm × 40 cm = 96,000 cm³.

Pricing applies per package. Oversized, unusually shaped, fragile, dangerous, joined packages, or freight requiring two-person or mechanical handling may be charged at the pallet rate or quoted separately.

PALLET OR PART THEREOF

Freight occupying any portion of a standard pallet position, up to a 1,200 × 1,200 mm footprint and a maximum loaded height of 1,800 mm.

Freight extending beyond the standard footprint may be charged by the pallet spaces occupied. Over-height, unusually heavy or difficult-to-handle freight will be quoted separately.

FULL TRUCK - 6 PALLET SPACES

Reserves up to six standard pallet spaces for one customer to the same delivery location. A discounted full-truck rate applies. Oversized, over-height or unusually heavy freight will be quoted separately.

WAREHOUSE DROP-OFF POINT: 7/4 Victory East Street, Urangan QLD 4655.

URGENT DELIVERIES: Same-day or next-day deliveries may incur the full-truck rate where no other freight is scheduled or on board.

QUOTED SERVICES: Crane deliveries and refrigerated or frozen goods are quoted separately.

MULTIPLE PACKAGES: When four or more small packages for the same customer are delivered together, the applicable pallet rate will generally be charged where it is cheaper.
